Empowering Lives Through Sustainable Fashion.

One Stop Solution !

GINNING → SPINNING → KNITTING → PROCESSING → PRINTING → GARMENTING

“Sky Textiles Manufacturing Plant”

About US:

Sky Group is a leading textile conglomerate with a fully integrated vertical setup, spanning from cotton farming to garment manufacturing. Established with a mission to provide sustainable, high-quality textiles, Sky Group has grown into a powerhouse in the industry, driven by innovation, eco-friendly practices, and a deep commitment to uplifting local communities. With state-of-the-art infrastructure and a workforce dedicated to excellence, Sky Group operates through its five core branches, each contributing to different stages of the textile value chain.

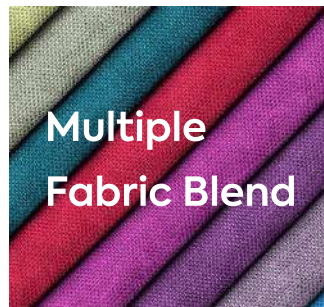

Mission

To produce the best textiles in the industry, we prioritize high-quality, sustainable fabrics through innovation and ethical practices, while supporting community growth and minimizing environmental impact.

Vision

To lead the textile industry by creating a fully integrated, sustainable ecosystem that uplifts local communities through job creation and skill development. We strive to provide society with high-quality, eco-friendly textiles and garments, ensuring that our innovations not only meet global standards but also support the growth and prosperity of rural regions. By empowering people and delivering sustainable solutions, we are shaping a brighter, greener future for generations to come.

TYPES OF FABRIC

OUR STRENGTH IN FABRICS WITH CAPACITY OF 600 TONNES / MONTH.

► Types of fabric

- Single Jersey (With Spandex)
- Terry
- Fleece - 2 Thread & 3 Thread with Sueding option with or without brushing
- GSM Range 120 GSM - 450 GSM With Multiple fabric Blend
- Rib & Interlock Fabric
- Waffle & mini - Waffle
- Pique - with collars and cuffs standard as well as jacquard

KNITTING INNOVATION, ONE STITCH AT A TIME

Our Knitting Division is powered by state-of-the-art high-speed automatic Circular and Flat Knitting machines from globally renowned brands like Mayer & Cie (Circular Knitting) and Matsuya (Flat Knitting). With an impressive production capacity of 10,000 MT of fabrics per annum, we are equipped to meet both domestic and international market demands with precision and quality.

We specialize in manufacturing an extensive range of fabrics, ranging from 18 to 28 Gauge, ensuring versatility across multiple blends. Each fabric roll undergoes thorough inspection by our experienced Quality Control team using advanced light sources to maintain superior quality standards.

At Sky Textiles India Pvt. Ltd., our commitment to quality and innovation enables us to produce premium fabrics that cater to the ever-evolving needs of the garment industry.

Knitting Machine :

- Single Jersey machines
- Rib Machines
- Fleece Machine
- Interlock Machines
- Terry Machines
- Collar and Cuff Machines

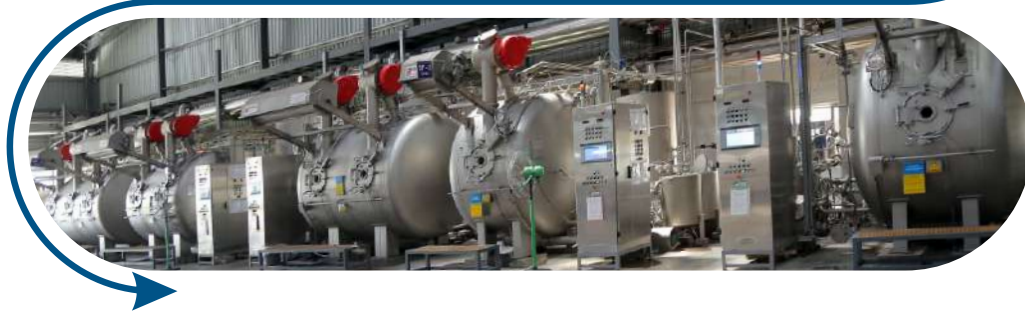

Types of Fabric :

- Slub, Neps, Neepy Slub Effect
- Thik and Thin Effect
- Yarn dyed Fabric
- Range 120 GSM - 450 GSM
With Multiple fabric Blend

Capacity :

- Knitting : 20 Tons Per Day
- Machine Manufacturer
: High speed Circular knit
: Mayer & Cie Flat knit : Matsuya

Make	Type	Dia & GG	No of Mcs
Mayer Cie	Single Jersey / Pique	30x24	3
Mayer Cie	Single Jersey / Pique	30x28	3
Mayer Cie	Single Jersey / Pique With Spandex Attachment	30x28 Open	6
Mayer Cie	Single Jersey / Pique With Spandex Attachment	34x28 Open	4
Mayer Cie	Interlock & With Spandex	30x28	6
Mayer Cie	Interlock & With Spandex	30x24	4
Mayer Cie	Rib / Waffle	30x18	1

Unitex	Terry / Fleece	30x20	5
Unitex	Terry / Fleece	34x20	5
Matsuya	Flatknit	14gg	10
	Flatknit - Jaquard Structure	14gg	1

▶ Continuous Dyeing Excellence

- High Efficiency & Precision
- Uniform Color Application
- Sustainable Dyeing Process

▶ Soft Flow Innovation

- Gentle Fabric Treatment
- High Fabric Quality
- Eco-friendly Operations

Sky Textiles India offers vibrant, durable prints with precision using rotary and flatbed printing, ensuring quality and sustainability.

DYEING – BRINGING FABRICS TO LIFE WITH COLOR AND PRECISION.

- We have Vertical set up with both continuous bleaching and dyeing range and soft flow exhaust Dyeing that covers all kind of product ranging multifibre and multi-weight
- We have color Service Auto dispensing Unit Digital Color matching Instruments (Data color-1000)
- Dyeing with Sustainable Dyes and Chemicals with Latest Technology and environmental Friendly approach
- At ETP we use 95% Recycle water and Zero Discharge Plant to save Water

Continuous Machines

Manufacturer : Erbatech Germany
 CBR-20 MT/Day, CPB-15 MT/Day,
 CWR-20 MT/Day

Soft flow Dyeing Machines

Manufacturer : Brazzoli
 Capacity : 750 Kgs, 500 Kgs, 250
 Kgs, 100 Kgs, 50 Kgs, 25 Kgs, 10 Kgs

PRINTING – TRANSFORMING FABRICS WITH ART. CAPACITY 180 TONNES

- Equipped with advanced Zimmer Rotary Printing machines, we offer versatile printing solutions with exceptional precision.
- There is unique combination for printing covering singeing and continuous dyeing and bleaching range

PRINTING METHODS

- PIGMENT
- REACTIVE
- Discharge
- DISPERSE
- GLITTER
- BURNOUT
- GLOW IN THE DARK
- FINE MESH
- LASER ENGRAVING

Make	Type	Repeat	No of Colours
Zimmer	Rotary	Up to 1 mtr	8

FINISHING

TESTING LABORATORY

FINISHING CAPACITY 50+ TONS/DAY

We specialize in high-quality textile finishing processes, ensuring superior fabric quality, enhanced durability, and an impeccable finish. Our advanced machinery and expert workforce enable us to deliver precision and consistency in every batch.

TYPES OF FINISHING

Mechanical Finishing

- Sueding
- Brushing

Chemical Finishing

- wicking
- antimicrobial
- Liquid
- Anti Pilling
- Uv Finish

- Cutting-edge technology & precision
 - Sustainable & eco-friendly processes
-

ADVANCED FABRIC TESTING LABORATORY

- We have well established NABL acridated Laboratory ensureing the consistant quality product and covering all testing of all knitted fabric nd Garments as per ISO , AATCC and related Modified Norms.

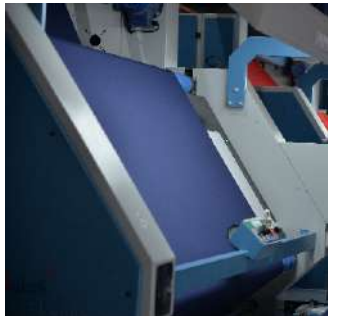

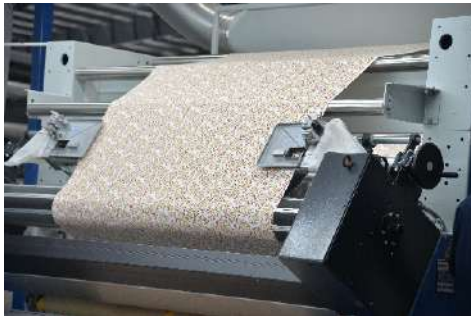

Physical Lab comprises with the facility of dimensional stability test equipment.

- Stretch properties testing
- Strength test (Bursting & Tear)
- Pilling Test etc.

Chemical Lab compromises with the infrastructure of recipe formulation through spectrophotometer Auto dye dispenser from Technorama and Ahiba lab dyeing equipments.

- Color fastness properties
- Dyes and chemical Testing
- The Developed recipe is uploaded to Sedo master for Bulk Dyeing.

MACHINE TYPE

SKY PRIMWEAR INDIA PVT. LTD.

Capacity to make 750,000 Pieces / Month, which includes range of products

- INNERWEAR • FORMAL WEAR • ACTIVEWEAR • CASUAL WEAR
- LOUNGEWEAR • ATHLEISURE • HIGH FASHION

OUR CERTIFICATIONS

OUR CLIENTS

AUTOMATION

- ▶ Auto cad Cutting Machine.
- ▶ Software with Animation for Virtual configuration.
- ▶ Software for Realtime analysis of process.
- ▶ Software for Embroidery design,
- ▶ Oval Printing Machine for any kind of photoshop print.
- ▶ Simplified stitching method with attachments.
- ▶ trimmers, cutters, pullers and folders.

- ### LECTRA AUTOMATIC CUTTING FEATURE
- ▶ Using Laser to increase the Accuracy
 - ▶ Consistent Quality
 - ▶ Optimize Fabric usage & Consumption
 - ▶ High Cutting Quality & Performance
 - ▶ Increased level of Automation

- ### SPREADER MACHINE FEATURE
- ▶ Automated Spreading
 - ▶ Tension free Spreads of Flat
 - ▶ Automatic Edge Alignment
 - ▶ Spreading Length Memory
 - ▶ Optimizing Material Utilization

SEWING SECTION FEATURE

- ▶ We Utilize Latest Modern Machines
- ▶ Better Seam Quality
- ▶ Prevents from being stained with Oil

GINNING

We have always kept focus on modernization, automization and enhancement in our manufacturing infrastructure, which has made us prominent, powerful and progressive group.

SPINNING

▶ Spinning Excellence

- **Blow Room & Carding:** Truetzschler with i-Scan Combo & auto doffer
- **Preparatory:** Latest LMW machinery
- **Ring Frame:** LR9/AXL with Sussen Compact & Pinter monitoring

▶ Quality & Precision

- **Link Coner:** Schlaforst with auto doffer & Uster Quantum 3
- **Lab Testing:** Uster UT-6, AFIS Pro 2, Mag Genius 2

Ginning

Established in 2008, Ginning specializes in cotton ginning, processing over 1000 MT of cotton per month. With modern facilities and a commitment to quality, Ginning ensures that raw cotton is prepared to the highest standards for further production stages. It remains a cornerstone of Sky Group's supply chain, known for delivering superior raw materials.

TYPES OF COTTON

We are processing following cotton and varieties for our customers.

1. Short-Staple cotton
2. Medium Staple Cotton
3. Long Staple cotton
4. Extra-Long Staple Cotton

Spinning

Spinning, established in 2015, is a renowned spinning mill producing high-quality compact yarn. With cutting-edge technology and a commitment to sustainability, it utilizes solar energy and advanced machinery to manufacture world-class yarns, catering to both domestic and international markets.

OUR SPINNING UNIT

- Spindles - 27360
- We produce 100% Combed Compact
- Fully Equipped Quality Control Laboratory with Uster 6 and Uster AFIS PRO
- Product Ranges from Ne-20 to Ne-40.

Aligning our 'Responsible For' Framework with SDGs

Our 'responsibility

Sustainability isn't just a goal—it's a commitment to creating lasting change for people, the planet, and our shared prosperity. At SKY GROUP, our 'Responsibility goes beyond planning; it's a pledge to take meaningful action. We're focused on making a positive impact at every stage of our value chain, ensuring benefits for the environment, the economy, and everyone we work with.

Responsible for Planet

Aim:
To protect the environment by conserving resources, improving efficiency, and enhancing innovation.

- **Energy & Emissions Management:**
Improve energy efficiency and adopt renewable energy to mitigate emissions.
- **Water Neutrality:**
Reduce water consumption and aim for water neutrality and water positive.
- **Chemical & Materials Stewardship:**
Align with global standards for zero discharge of hazardous chemicals and source sustainable alternatives.
- **Waste Towards Circularity:**
Manage our waste to reduce, reuse, recycle, and ultimately close the loop.

Responsible for People

Aim:
To nurture a growth-oriented environment for our employees and the communities we operate in.

- **Empowered Workforce:**
Enhance employees' technical and soft skills.
- **Employee Health & Well-being:**
Ensure safety, create awareness, and tackle health issues our people face.
- **Fair & Respectful Workplace:**
Uphold human rights through executed policies and robust grievance management systems.
- **Corporate Social Responsibility (CSR):**
Drive impact in health, education, skill development, and environmental management.
